ALUMINUM AND BRONZE POWDERS

## ALUMINUM AND BRONZE POWDERS

**PRODUCT INFORMATION** - The addition of a small amount of solvent (correct for the vehicle being used) to the bronze powder will aid in making a smooth mixture and increase the brilliance of the finished job. Many printers add the bronze powder to the desired vehicle until a heavy paste results. The paste is then thinned to screening consistency with the correct solvent.

**BRONZE POWDERS** - Use the proper clear base (bronzing vehicle) and thinner, depending on the substrate to be printed. Use approximately 2-3 lbs of gold powder to 1 gallon of clear base and 1-1 1/3 lbs. of Aluminum powder to 1 gallon of clear base. For best results use Monofilament screen fabric of 180 mesh to 230 mesh.
