## Design Line Tape

39.95 roll

3.5 mm (1/8" ) Width x 164 ft.   
 Knife Like Cuts

-Allows stretching, follows contours and turns easily in any direction-

Excellent for creating designs & stripes with no extra steps required to achieve a perfect cut

Watch feature video [here](#)

Knifeless is a tape that can be used to cut graphic film without using a knife.

The tape has a visible high strength filament (thread) in the middle that is used to do the cutting.

A clean sharp cut is made along the entire length, which is as good as a knife.

The excess tape removes cleanly leaving absolutely no adhesive residue.

A must have in any installer's kit, the Knifeless Tech System, alleviates the issues that novice and even expert installers dread; cutting on paint.

Knifeless Tape products are used in 3M's Advanced Installer Training Class
