COROPLAST®

Coroplast is an extruded, twin-wall plastic sheet based on a high-impact polypropylene copolymer. This high quality, polypropylene profile sheet is formulated specifically for screen printing, displays and packaging. It uses a copolymer resin to increase impact and low temperature performance while retaining flexibility.

At regular temperatures most oils, solvents, and water have no effect on Coroplast, allowing it to perform under adverse weather conditions or when exposed to harsh chemicals.

Standard colours: White, Natural, Ivory, Yellow, Brown, Red, Orange, Light Blue, Dark Blue, Navy Blue, Silver Grey, Green and Black.

Outdoor Durability - up to 3 years

Our Vinylefx® Outdoor Durable Series, which provides up to three years of outdoor life, is comprised of a variety of cost-effective simulated metal, light-diffracting and 3-D patterns, designed for long-term outdoor signage. For demanding applications such as truck and boat graphics, the Vinylefx® Durable Series films provide a superior alternative to the expensive simulated gold-leaf films.

RTape Vinylefx® is exceptionally suited for general purpose signage applications and a cut above other “special effects” films thanks to a proprietary deep-embossing technology that provides a crisper three-dimensional appearance to each pattern. **Because the Vinylefx® is vinyl, not polyester, they require no top coating prior to printing!** They print, cut, weed and handle just like intermediate vinyl.

- Easy to cut and weed.
- Vehicle markings.
- Very flexible and can be applied over rivets and corrugated surfaces.

5700 is a flexible reflective film (Engineering Grade) providing wide-angle reflectivity of incident light and giving excellent night and day visibility. The face is made with a layer of microscopic glass beads of a high optical quality. These are embedded into a colored film, which then act as a lens. A metallized back provides the mirrored surface for reflection. The film is coated with a **white, high strength, permanent, acrylic adhesive**. A 92# white polycoated paper liner offers stability and excellent layflat qualities.

[click for photos, specs, data,applic.](#)

Ultimate Black is a high gloss self-healing black vinyl which is ideal for accents during wrapping. It installs like a PPF product using a wet application method because there is no air egress liner. The material can stretch slightly, but is not designed to wrap an entire vehicle. It is perfect for roofs, small accents and especially chrome deletes. The special coating allows it to have an unrivalled high gloss finish that will self heal from small scratches and maintain it's true black look for years.

6000 REGULAR REDUCER
6001 LOW TEMPERATURE REDUCER
6002 HIGH TEMPERATURE REDUCER

Formulated to improve flow at normal temperature conditions by reducing viscosity without significantly altering the quality of the coating being reduced. The Low Temp Reducer is formulated to improve flow and levelling at low temperatures by reducing the viscosity and accelerating the evaporation rate without significantly altering the quality of the coating being reduced. The High Temp Reducer is formulated to improve the flow and levelling at high temperatures by reducing the viscosity and slowing down the evaporation rate without significantly altering the quality of the coating being reduced. The reducers may be used with Lettering Enamels, Bulletin Colours, Art and Sign Poster Colours, Pearlescent Enamels or Fluorescent Colours.

#6000	Regular Reducer	47.70/qt.
#6001	Low Temperature Reducer	37.35/qt.
#6002	High Temperature Reducer	35.30/qt.

HARDENER (4007) is designed to accelerate drying time for Lettering Enamels, Bulletin Colours and Pearlescent Enamels. The Hardener will extend colour life, increase gloss, and improve adhesion to most substrates. Adding Hardener to the paint will aid in preventing "lifting" when overcoating with "UCO" Urethane Clear Overcoat, Speed Dry UV Acrylic Clear or an automotive "style" clearcoat. Add up to 10% in volume into 1Shot or Chromatic paint. Recommended shelf life is 14 days after tin is opened.
