Blockouts and Primers

Block Out White

PBOW602 BLOCK OUT WHITE (4420602) is a high viscosity block out white. Higher in pigmentation than PBOW Block Out White, this material is chosen when virtually complete coverage over a previously painted sign is desired. This is particularly important when topcoating with the more transparent colours and colour mixes. Solvent based.

---------	----------------	----------------

CHROMATIC PRIMER/METAL & WOOD WHITE

METAL and Wood Primer White - is a fast drying high opacity primer with good adhesive qualities on both wood and steel. A coarser pigment particle offers the system greater "tooth" than PBOW Block Out White. Metal and Wood primer sands easily. It is also good for use as a primer-burnish ing sealer under gold sizes and may be slightly tinted. Solvent based.

6002 HIGHT TEMPERATURE REDUCER

Formulated to improve flow at normal temperature conditions by reducing viscosity without significantly altering the quality of the coating being reduced. May also be used as a thinner for spray applications. The High Temp Reducer is formulated to improve the flow and levelling at high temperatures by reducing the viscosity and slowing down the evaporation rate without significantly altering the quality of the coating being reduced. The reducers may be used with Lettering Enamels, Bulletin Colours, Art and Sign Poster Colours, Pearlescent Enamels or Fluorescent Colours.

HARDENER (4007) is designed to accelerate drying time for Lettering Enamels, Bulletin Colours and Pearlescent Enamels. The Hardener will extend colour life, increase gloss, and improve adhesion to most substrates. Adding Hardener to the paint will aid in preventing "lifting" when overcoating with "UCO" Urethane Clear Overcoat, Speed Dry UV Acrylic Clear or an automotive "style" clearcoat. Add up to 10% in volume into 1Shot or Chromatic paint. Recommended shelf life is 14 days after tin is opened.

Brush Cleaning and Care

Always clean out a brush thoroughly after use. The general rule for cleaning: the solvent or thinner that goes with the paint being used, becomes the cleaning agent. If the paint or medium you are using is compatible with mineral spirits, it is suggested using this as a cleaning agent.

When brush is cleaned, carefully wipe the hair without pulling. Storing the brush greased with light oil prevents any residual paint from drying on the brush.

Do not allow cleaning agent to get into the glued part of the brush, some cleaning agents can attack the glue and cause the hair to loosen.

Kafka

PINSTRIPING BRUSHES

Kafka Signature Series Scrollers series 1660

All Kafka signature series pinstriping brushes can turn corners without “flare-out” and without the user “rolling the brush”—just lift and work the tip for designs that usually take years to master. Works equally well with urethanes and oil-based enamels

Size 0 — 20.75 ea. The size 0 brush is the smallest available. It’s capable of turning very tight corners and very fine design work while still maintaining great line consistency due to the nature of design and combination of synthetic and natural hair.

Size 1 — 20.75 ea. The size 1 is slightly larger than the 0 and will perform the same as the 0 with a slightly heavier line. As with all the Kafka brushes, they perform with oil-based enamels as well as urethane striping paint.

Size 3 — 20.75 ea. The size 3 will work in a wide variety of applications from scroll striping to shorter, long-line designs. This brush will give the user greater control in all applications and flatten the learning curve for novice strippers. The size 3 is also the most used favorite of its designer, Steve Kafka.

Size 5 — 21.25 ea. The size 5, which is slightly larger than the size 3, holds more paint and will accomplish heavier designs with ease. Depending on pressure, the line thickness can reach 1/4” and fine lines to 1/16” in the other direction. This brush is a favorite for outlining larger flame layouts, cars, trucks, and semi trucks.

Size 6 — 21.25 ea. The size 6 will give you the heavier lines needed in many instances, but still can deliver delicate design work. It’s used for initial layouts followed by smaller sizes for more delicate additions in beautiful combinations.

Kafka Signature Series Longliners

This series of longliner brushes was designed to run consistent, long lines with greater line quality and control. The handles were left long so they may be trimmed to fit inside the web of your hand, or to use as they are. The longliner series has received incredible accolades from all of the top long-line pinstripers

Size 5/0 — 23.50 ea. The 5/0 is the finest longliner brush available. It will lay pin lines for incredible distances with ease and beautiful line quality. It soon will become the standard for the fine line strippers everywhere.

Size 3/0 — 23.50 ea. The 3/0 will match any brush currently available for fine line work, but surpasses them all for durability, line quality, and control.

Size 00 — 23.50 ea. The 00 is probably favored for lines on most cars. Other brands of brushes include the size 00, but when you use our other sizes the reason for us making a variety becomes clear.

Size 0 — 24.50 ea. The size 0 brush performs all longliner functions as the size 1, just not as heavy. Synthetic and natural hairs are used for long life, line consistency, and control.

Size 1 — 24.95 ea. Size 1, the largest brush of this series, holds lots of paint and will do over a 1/4” (6.4 mm) line with ease. It will also do fine lines with less pressure perfectly

Kafka Design Series Short Stroke Brush

we have a shorter version of our number one seller, the #3 signature series scrolling brush. This will help the new pinstriper navigate intricate loops and scroll designs easily and flame outlines will be achieved with greater ease.

It has a gold plated ferrule, a dark stained natural wood handle, and the most successful hair combination. **One size only. - 22.50 ea.**

This angular fitch is good for awning work. Sign painters also find it easier to use an angular brush when working on a wall or upright surface. It is good for outdoor work (awnings, walls, bulletins and rough surfaces). This brush is not chiseled. There is no advantage to chisel an angular liner, since most sign painters want an even down stroke.

LETTERING BRUSHES – MACK

Mack Wizard Scribe Synthetic Sable Lettering Brush

You will notice that the hair length is longer than a traditional quill which gives the brush a precision snap without losing that coveted feel. This brush carries the paint well and delivers the paint effectively.

Let's see what Steve “Wizard” Chaszeyka has to say about the brush.

“This new synthetic lettering quill is full of surprises. Snappy and controllable, this brush gives me the moves I like to lay out script, casual and more disciplined letter styles as well. Carries a lot of paint, and delivers on point. Tight and efficient, no wasted moves.”

With the exorbitant price of pure red sable today the Wizard synthetic brush is an excellent alternative at a fraction of the cost.

MACK FOXY TAILS BRUSH SET OF 6

FOXY TAILS (M/T)

The latest brush set to join the Tidwell family is here!

This set consists of **SIX** new brushes:

Sneaky – Medium, round, pointed brush

Sly Filly – Small, flat, long filbert brush

Crafty – Medium, flat, long filbert brush

Tricky – Large, round, pointed brush

Slick – Extra long, round, pointed brush

Bushy – Large, flat, extra long filbert brush

4 out of the 6 are pretty unique. The shape, hair configuration, hair lengths, and types of hairs were tweaked to create some really cool brushes. We butchered a lot of art and lettering style brushes and tested a variety of synthetic hair combinations in order to get these exactly the way we wanted them.

Two of them are pretty traditional round, pointed brushes... but even those have unique lengths and sizes. Again, just a little Tidwell tweak on the standard round brush.

Tidwell's Foxy Tail brush set with selected synthetic hair and orange lacquered handles.

Comfortable to hold, easy to care for and robust. Suitable for all acrylic paints, enamels and urethane paints.
 Set of 6 – 47.95

MACK M/T 6 PIECE BRUSH SET

Tidwell Brushes – M/T 6 Piece Set

These brushes work great with enamels, acrylics, oils, and I’m sure they will work with just about any other medium.

You have the Mini, Lil’Bit, Slim, Skinny, Lil’Bit More, and Flat Top. The handles are a little fatter in the belly (where you grab ’em), so they have a little more room for normal-sized hands (see the picture for a good idea). The bristles vary depending on the brush size and configuration. The smaller brushes are made of a softer, fine quality synthetic. The large flat and the long outliner are made with golden synthetic.

They blend paint really well without the brush strokes of stiffer bristles. They also work for lines, shading, and for sharp detail. The brushes really speak for themselves.

I know there is no perfect brush or brush set for everyone, but I seriously doubt you’ll find a more useful brush set at this price.
