application guide

K80000 Hybrid Car Wrapping

KPMF Hybrid Wraps are superior quality soft Polymeric PVC films formulated by using the latest advances in PVC and pigment technology to offer exceptional dimensional stability and excellent long-term durability. They are suitable for long term applications in outdoor and indoor environments, offering excellent cutting and weeding properties. The combination of soft vinyl formulation and specific Airelease adhesive design offers excellent conformability and adhesion which allows the film to be removed without leaving adhesive transfer. Typical applications include total vehicle cover, vehicle graphics, signs and decal applications which require exterior exposure of 5 to 7 years. The material is designed to be removable, under controlled conditions, up to a period of three years.

K88025 Ultimate Hi Gloss Black Roof Wrap 60" width

click for photos, specs, data,applic.

Ultimate Black is a high gloss self-healing black vinyl which is ideal for accents during wrapping. It installs like a PPF product using a wet application method because there is no air egress liner. The material can stretch slightly, but is not designed to wrap an entire vehicle. It is perfect for roofs, small accents and especially chrome deletes. The special coating allows it to have an unrivalled high gloss finish that will self heal from small scratches and maintain it's true black look for years.
PRICES - 60" Width - 1 to 4 yds.-68.00 yd.   5 to 9 yds.- 59.85 yd.   10 yd. Roll-56.70 yd.

smf SMF 3 MIL CALENDERED TRANSPARENT FILM

These Transparent coloured vinyls are designed for backlit signage, window graphics and colour change overlaminating use. While not optically clear, they are designed for glass decorations and light boxes. The film is a monomeric calendered vinyl with a gloss finish. They come with a liner that offers superior cuttability with conventional die-cutting and computer sign making systems.

  3 to 5 yr. outdoor durability based on normal exterior conditions.

Special Effect Film 24" wide

SMF's Special Effect Film line is a line of metalized vinyl films. These films print beautifully when using thermal transfer ribbons, screen inks, or solvent/eco-solvent inks. These Special Effect Films have an outdoor durability of up to 5 years.

Due to variances in computer monitor displays, colours shown are only our best representation.

For true colour match, please email or phone for a copy of our SMF colour guide.

METALLIZED POLYESTERS

METALIZED POLYESTERS

Custom films with the brilliance and lustre of true metal foils and the handling and workability of vinyl. These films are designed to accept a variety of solvent and u/v screen inks. Pre-testing is recommended. Good for indoor and short term outdoor applications. A high tack premask is recommended.

MACtac®

REFLECTIVE mactac

Features and uses:

- Easy to cut and weed.
- Vehicle markings.
- Very flexible and can be applied over rivets and corrugated surfaces.

5700 is a flexible reflective film (Engineering Grade) providing wide-angle reflectivity of incident light and giving excellent night and day visibility. The face is made with a layer of microscopic glass beads of a high optical quality. These are embedded into a colored film, which then act as a lens. A metallized back provides the mirrored surface for reflection. The film is coated with a white, high strength, permanent, acrylic adhesive. A 92# white polycoated paper liner offers stability and excellent layflat qualities.

Outdoor Durability - up to 3 years

Our Vinylefx® Outdoor Durable Series, which provides up to three years of outdoor life, is comprised of a variety of cost-effective simulated metal, light-diffracting and 3-D patterns, designed for long-term outdoor signage. For demanding applications such as truck and boat graphics, the Vinylefx® Durable Series films provide a superior alternative to the expensive simulated gold-leaf films.

RTape Vinylefx® is exceptionally suited for general purpose signage applications and a cut above other "special effects" films thanks to a proprietary deep-embossing technology that provides a crisper three-dimensional appearance to each pattern. **Because the Vinylefx® is vinyl, not polyester, they require no top coating prior to printing! They print, cut, weed and handle just like intermediate vinyl.**

48"	237.00
54"	267.00

A medium- tack paper application tape, R Tape 4050 allows easier release of larger graphics and those with high gloss levels, and is also suitable for lifting printed graphics without the risk of damaging the print. Works well in wet applications. Economically priced. Has the same features of the Conform series but without the RLA Conform release liner adhesion additive

AT-60 CLEAR

Clear Application Tape   100 yd. roll

AT-60 Clear Choice is an economical, ultra-clear application film which is priced as an alternative to standard grade application paper. AT-60 Clear Choice features a slightly tackier adhesive, which facilitates the transferring of problematic vinyl films. The new adhesive system is very forgiving. If adhesive touches adhesive, the Clear Choice film pulls apart easily, with no adhesive delamination.

APPLICATION FLUIDS- ADHESIVE REMOVERS

RAPID TAC OR RAPID TAC II

For "wet" applications • Rapid Tac II for other than Premium Vinyls.

STEP 1

1. Thoroughly clean panels with Rapid Tac and kitchen paper towel. Do not use other cleaners or solvents nor cloth towels or commercial paper towels.

STEP 2

2. Spray panels again with Rapid Tac. Peel backing off decal and place on wet panel. You may also spray adhesive side of decal (See fig. 2)

STEP 3

3. Align decal. Use the squeegee to remove fluid, using a good deal of pressure and working from the center out toward the edges in all directions. (See fig. 3)

STEP 4

4. Wait 2-3 minutes. If decal has cover tape saturate it with Rapid Tac, then remove the tape. Wipe with paper towel and your application is complete. (See fig. 4)

110822

RAPIDTAC

click here for demonstrations

RAPIDTAC APPLICATION FLUID is a "super-wet" liquid which cleans the substrate surface and makes the application of even the largest of pressure sensitive markings simple, allowing the correct positioning before final placement.

32oz. with sprayer - 17.55
128 oz. (gallon) without sprayer - 48.75

RAPIDTAC APPLICATION FLUID II

RAPID TAC APPLICATION FLUID II - **has the same benefits as RAPIDTAC, but also allows wet application of polyesters, reflectives, and metallized films. Improves bonding on economy type vinyls**

32 oz. with sprayer - 22.95
128 oz. w/o sprayer - 66.95

RAPIDTAC ADHESIVE REMOVER

RAPIDTAC WATER SOLUBLE ADHESIVE REMOVER removes glue left on surface after removing decals or film. Works on painted surfaces, some plastics and other surfaces. Not recommended for anodized finishes.

32 oz. with sprayer - 39.50

128oz (gal.)w/o sprayer-107.00

Remove most adhesives in 30 to 60 seconds!
Scoop off adhesive in 60 seconds like shovelling snow!

RAPIDPREP

RAPID Prep **is a water-based nonflammable wash solvent for preparing surfaces for painting. Totally removes silicone, wax, grease, and oil safely. Especially useful on plastic auto parts.**
32 oz. with sprayer - 17.70
128 oz. w/o sprayer - 51.00

RAPID CLEAR

Cleans and polishes any transparent material eg. glass, Lexan, Plexiglass, most Polycarbonates, and leaves a professional lustre.
Also does an excellent job on non transparent surfaces.
Use as a final cleaning for sign work.
32 oz. w/sprayer -   15.25
128 oz. w/o sprayer   41.00

RAPID REMOVER
Adhesive remover, works in 60 seconds.

STEP 1

1. Remove decal with heat lamp or heat gun.

STEP 2

2. Now spray glue residue with Rapid Remover and let it penetrate for 30-60 seconds.

STEP 3

3. Using squeegee, scrape to remove glue residue.

STEP 4

4. Now spray Rapid Remover on rag or paper towel and wipe area clean.
5. Thoroughly rinse area with Rapid Tac or Rapid Tac II

RECOMMENDATION:

DO NOT clean any substrate with glass cleaners, paint solvents, (prep-sol, pre-cleno, etc.). Just clean substrate with: Rapid Tac Application Fluid, Rapid Tac II Application Fluid, or for stubborn jobs like silicone, wax, grease or oil, clean with Rapid Prep. All 3 products were built to clean leaving no contaminating residue.

DO USE kitchen type paper towels and Rapid Tac products to clean prior to application of vinyl or films ONLY!

AUTOMARK™ CAST
with DRIFT® Technology

GF 830 AutoMark™ Cast with DRIFT® Technology is a premium full-body gloss white cast wrap film. The DRIFT® Technology and adhesive combination is engineered to provide superior repositionability and slidability. Developed to meet the long-term demands of full or partial fleet and vehicle wraps as well as many other graphic applications. DRIFT® Technology offers the right amount of adhesive tack with Micro Air Egress channels that allow for quick, easy and bubble-free applications. GF 830 AutoMark™ Cast provides an excellent white point, delivering the perfect solution for high-quality printing across Eco-Solvent, Solvent, Latex, and UV print systems.

Unique Features:

- Full-Body Cast Film with Superior Repositionability
- Excellent White Point for Vibrant Printing
- DRIFT® Technology provides Enhanced Slidability
- Micro Air Egress Channels, Perfect for Easy
- Bubble-Free Applications

RoughRAP™ WALL WRAP GRAPHICS

18 mil   HIGH GLOSS finish   TEXTURED finish   Permanent

Application: Wall Graphics
Material: RoughRAP™

Specialty | Solvent-based, UV Cured Ink Jet Media

IMAGin® RoughRAP™ is a 2.1-mil soft white gloss, highly conformable PVC film designed for solvent-based ink jet printing. The product is coated on one side with a high-tack, permanent, opaque acrylic adhesive. RoughRAP is specifically designed for direct application onto exterior and interior brick walls for a painted on look. Use of an overlaminate will extend the life of the graphic and allow for easier handling during installation.

Features and Benefits:
- 2.1-mil highly conformable vinyl face
- High-tack, permanent adhesive
- 80# polycoated liner for excellent printability and layflat
- Superior print quality for vibrant images

Typical Uses:
- Exterior and interior brick walls

Roll 54"x 75ft. - 719.00   RR100W54L75
Roll 54"x150ft.-1398.00   RR100W54L150

Print Shield® Anti-Graffiti

ANTI-GRAFFITI LAMINATE

SEAL

watch demo video here

This product safeguards prints which may become vulnerable to graffiti by making them washable resistant to a very large number of detergents and solvents.

Print Shield consists of a high performance PCTFE film which protects images printed on UV or solvent inkjet printers from a wide variety of stains and chemicals such as paint, permanent marker, and acrylics

Applications include rigid indoor and outdoor displays, outdoor signage, wall murals, point of purchase/tradeshow displays, window graphics, and backlit signs.Designed to be used with inks that have long light-fastness, it is an extremely durable film with an estimated outdoor life of more then seven years (with non-immersed

COROPLAST®

Coroplast is an extruded, twin-wall plastic sheet based on a high-impact polypropylene copolymer. This high quality, polypropylene profile sheet is formulated specifically for screen printing, displays and packaging. It uses a copolymer resin to increase impact and low temperature performance while retaining flexibility.

At regular temperatures most oils, solvents, and water have no effect on Coroplast, allowing it to perform under adverse weather conditions or when exposed to harsh chemicals.

Standard colours: White, Natural, Ivory, Yellow, Brown, Red, Orange, Light Blue, Dark Blue, Navy Blue, Silver Grey, Green and Black.

Pure Color™ Monet Canvas

S	E S	Lx	UV
Solvent	Eco-Solv.	Latex	Ulta Violent

Monet is a heavyweight 10 oz/yd^2 coated canvas with a prominent tooth that is ideal for giclée art reproductions, as well as for eye-catching POP signage, trade show graphics and store signage. This strong, yet flexible, canvas features a uniform satin texture and its specialized coating allows for vibrant, photorealistic printing with a wide color gamut. Designed for use with solvent, eco-solvent, latex and UV printers, Monet's tight weave also allows it to be used with vacuum-carried flat bed UV printers.

CHROMATIC Bulletin Colours

BULLETIN COLOURS are ideal for use on signs and billboards where a full gloss finish is desired. Single coat coverage, fast dry, fast cut in, extreme high gloss and pure colour clarity produce a dazzling finished product. They are formulated as a solvent based enamel for superior durability, workability and easy application on large areas and/or rough surfaces such as billboards or masonry walls. The Bulletin Colours may be brushed, rolled or sprayed to a smooth, glass-like finish.

LEAD FREE!

ART AND SIGN POSTER COLOURS are flat oil based paints, which are waterproof, free flowing and self-leveling, will seal porous surfaces, have excellent hiding power and will not wrinkle paper. These products are designed for interior and short-term exterior use on paper, cardboard, muslin, stretched canvas, wood, masonite, metal or glass (not for use on windshields.) They are intended for use by commercial artists and show card writers for displays, designs, backgrounds and accents.

"FILTERAY A CLEAR" - Gallons - 130.00

CHALKBOARD PAINT Black

Versatile Chalkboard paint is a matte, hard resin finish, suitable for applying to slate, plywood, hardboard and smooth concrete surfaces. **1 Qt. (litre) 29.50**

1 Shot Speed Dry UV Acrylic Clear

UV Acrylic Clear is a multipurpose solvent base acrylic clear with ultra violet absorbers that help protect against colour fading. This product is for interior or exterior use on PVC pressure sensitive vinyl, wood, masonite, MDO plywood, drywall, metal and plastic. A super clear, fast dry and blister/stain resistant topcoat. Excellent for use as a clear overcoat for most inkjet prints.

4005A-	12 oz. Aerosol -	21.00 spray tin
4005-	32 oz. Quart tin	62.70 qt.
4005-	128 oz. Gallon tin	201.00 gal.

CHROMATIC "GRAPHIGUARD" UV MATTE CLEAR TOPCOAT

These UV Resistant Waterborne Matte Clears offer moderate mar resistance and excellent UV protection both for themselves as well as the surface coatings they cover. GRAPHIGUARD Matte Clears are an exceptional choice as a protective topcoat for lettering or Bulletin enamels as well as - UV Ink, Solvent, Eco-Sol, and Thermal Resin Transfer print projects.

Apply Brush, Roller, or Spray

CHROMATIC®

4331030	Matte Topcoat	214.85/ gallon

CHROMATIC FLATTENING CLEAR

CLEAR FLATTENING PASTE unlike flattening agents from other industries, Chromatic has created a varnish additive which changes enamels in a range from just off gloss to matte by adding gradual amounts.

4329500	Flattening Paste	42.95 / quart

Blockouts and Primers

Block Out White

PBOW602 BLOCK OUT WHITE (4420602) is a high viscosity block out white. Higher in pigmentation than PBOW Block Out White, this material is chosen when virtually complete coverage over a previously painted sign is desired. This is particularly important when topcoating with the more transparent colours and colour mixes. Solvent based.

4420602	Blockout White	99.90/ Gallon

CHROMATIC PRIMER/METAL & WOOD WHITE

METAL and Wood Primer White - is a fast drying high opacity primer with good adhesive qualities on both wood and steel. A coarser pigment particle offers the system greater "tooth" than PBOW Block Out White. Metal and Wood primer sands easily. It is also good for use as a primer-burnishing sealer under gold sizes and may be slightly tinted. Solvent based.
Product No. 4403101 - Gallon - 95.50

CHROMATIC "TI-COTE" VINYL PRIMER

TI-COTE CLEAR PRIMER BARRIER COAT (4331010-GLOSS, is a high performance water based clear primer/barrier coating developed for use on vinyl substrates such as flexible faces, awnings, banners and self adhesive vinyls, to allow the use of enamel topcoats and lettering enamels.

58.19 / Quart	165.55/ Gallon

1 SHOT 5004 VINYL PRIMER

A clear, water based primer for vinyl and most rigid synthetic surfaces including expanded PVC, corrugated styrene, ABS plastics and most PVC vinyl film products.5004 Vinyl Primer creates a barrier against plasticizer migration, making surfaces suitable for finishing with 1Shot Background and Lettering Enamels, Chromatic Bulletin Colors and even Fluorescent and Art & Sign Poster Colors.While milky when applied, 5004 Vinyl Primer dries clear, and is generally ready to accept 1 Shot paint products in 30-40 minutes.

5004 Primer 108.74/Gallon	36.25/Quart

171022

Thinners - Reducers - Additives - Solvents

6000 REGULAR REDUCER
6001 LOW TEMPERATURE REDUCER
6002 HIGHT TEMPERATURE REDUCER

Formulated to improve flow at normal temperature conditions by reducing viscosity without significantly altering the quality of the coating being reduced. The Low Temp Reducer is formulated to improve flow and levelling at low temperatures by reducing the viscosity and accelerating the evaporation rate without significantly altering the quality of the coating being reduced. May also be used as a thinner for spray applications. The High Temp Reducer is formulated to improve the flow and levelling at high temperatures by reducing the viscosity and slowing down the evaporation rate without significantly altering the quality of the coating being reduced. The reducers may be used with Lettering Enamels, Bulletin Colours, Art and Sign Poster Colours, Pearlescent Enamels or Fluorescent Colours.

#6000	Regular Reducer	36.75/qt.
#6001	Low Temperature Reducer	28.80/qt.
#6002	High Temperature Reducer	24.95/qt.

HARDENER (4007) is designed to accelerate drying time for Lettering Enamels, Bulletin Colours and Pearlescent Enamels. The Hardener will extend colour life, increase gloss, and improve adhesion to most substrates. Adding Hardener to the paint will aid in preventing "lifting" when overcoating with "UCO" Urethane Clear Overcoat, Speed Dry UV Acrylic Clear or an automotive "style" clearcoat.
Add up to 10% in volume into 1Shot or Chromatic paint. Recommended shelf life is 14 days after tin is opened.

#4007	Hardener	74.00 1 pt.

TINTING

TINTING BLACK (4001L) AND WHITE (4002L) are tinting bases for use with Lettering Enamels and Bulletin Colours in achieving various shades without affecting the properties of the base coatings.

COLORS	1/2 pt.
4001 Tinting Black	24.55
4002 Tinting White	21.90

THINNER

EDGE "THE SIGN PAINTER'S THINNER"
(4311001)

Is a pre-mixed combination of flow enhancer and reducer for larger scale painting and lettering. This single component reducer/flow enhancer makes it easy to keep the paint flow up, especially when hand lettering larger scale copy and graphics as well as panels and backgrounds.

4311001	Thinner Quart	18.50
4311001	Thinner Gallon	42.50

BRUSH CLEANER

BRUSH CLEANER (4004) a premium product designed for cleaning brushes which have been used with 1 Shot and Chromatic oil based paints. Excellent for reconditioning, softening and renewing hardened natural and nylon brushes and has been specifically formulated not to interfere with the properties of oil based sign paints.

#4004	Brush Cleaner	21.90/qt.

GOLD LEAF - METAL LEAF
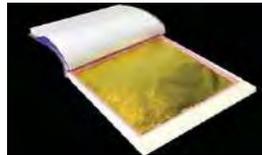

GOLD LEAF is sold by the book, and a book contains 25 leaves. The standard size for Gold Leaf is 3 3/8" x 3 3/8 ". A book of Gold Leaf will cover approximately 1 1/2 square feet; and 20 books will cover about 30 square feet (including some patchwork).

	BOOK(25 leaves)	PACK (20 Books
"GERMAN" GOLD LEAF 23 KARAT (LOOSE) Same high quality as Italian leaf. Ideal for both interior and exterior sign and decorative application. Will not tarnish.	112.00	1935.00
"GERMAN" GOLD LEAF 23 KARAT. (PATENT) Same as German Loose but supplied with individual tissue leaf for exterior gilding in the wind. Will not tarnish.	119.00	1995.00
COMPOSITION (DUTCH METAL) LEAF. is an imitation of gold, and is used for interior decorating only. It will tarnish after a short period of service. The leaves are 5 1/2" x 5 1/2".	17.50	292.00
SILVER LEAF is purer than Sterling. It is a superior grade of Silver Leaf, to be used on glass work only, where it can be properly backed up and protected from the air. If used for other than glass, it will tarnish in a short time.	33.00	545.00
ALUMINUM LEAF is used wherever the colour of silver is desired, and is generally never used on glass. 5 1/2"x 5 1/2"	5.80	108.00

GOLD LEAF SUPPLIES

Gilders Tip
One popular size:
3 1/2" X 2 1/4" length out.
Single thick Squirrel Hair.
The single thick tips are more
popular than the double thick, since
you can see through the single thick
hair and you are less likely
to make an error.
Series 1138 - **38.00 ea.**

3 1/2" x 2 1/4"
MACK
1138

1 SHOT FAST DRY GOLD SIZE
Fast setting allows gilding to begin in one hour. Use with quill, brush, roller or spray.

1/2 Pint size #4008 - $41.55

"DUX" Gold Size. Quick Drying, ready to gild in 1 to 3 hrs. Great for rush jobs. Drying action may be slowed by adding oil. Works well with gold or aluminum leaf. Colour may be added. **Pint size - 47.75**

"DUX" Water Based Size
Designed for all INTERIOR leaf work.
A water based gilding adhesive (size)
where extended tack time is required.
Emission Safe. No fire hazard
Minimum Toxicity   Quart - 48.00

"DUX" Oil Gold Size. Slow Drying
Usually ready for gilding in 10-12 hrs. Hold tack for approx. 12 more hours. Ideal for larger projects where extended time is required. **Pint size -47.75**

Easel Backs - Showcard Board - Paper

Peel off strip to expose adhesive.

Center easel on sign board, press firmly.

Fold easel and bend down reinforcing anchor tab.
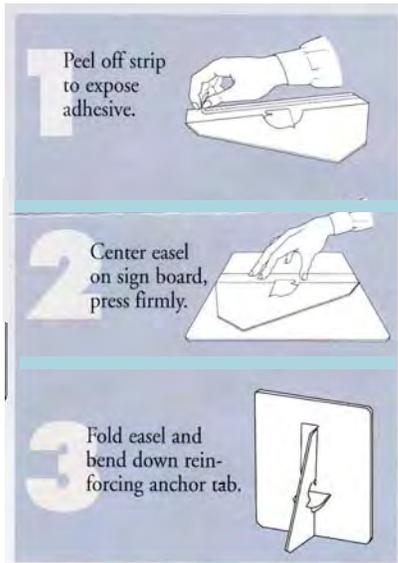

WHITE SELF STICK EASELS

Self -stick easels are attractive, sturdy and easy to use.
Application is fast and easy.
Simply peel and stick.
No messy glue.

Brush Cleaning and Care

Always clean out a brush thoroughly after use. The general rule for cleaning: the solvent or thinner that goes with the paint being used, becomes the cleaning agent. If the paint or medium you are using is compatible with mineral spirits, it is suggested using this as a cleaning agent.

When brush is cleaned, carefully wipe the hair without pulling. Storing the brush greased with light oil prevents any residual paint from drying on the brush.

Do not allow cleaning agent to get into the glued part of the brush, some cleaning agents can attack the glue and cause the hair to loosen.

Mack Series 818 Red Sable
Lettering & Showcard Brush

Red sable is more flexible and durable then squirrel. After painting is returns easily to its initial shape. The shorter hair length gives more control. However, red sable is not as soft as squirrel and will not carry as much paint.

Kafka

PINSTRIPING BRUSHES

Kafka Signature Series Scrollers series 1660

All Kafka signature series pinstriping brushes can turn corners without "flare-out" and without the user "rolling the brush"— just lift and work the tip for designs that usually take years to master. Works equally well with urethanes and oil-based enamels

click here to
see video

Size 0 — 20.75 ea.   The size 0 brush is the smallest available. It's capable of turning very tight corners and very fine design work while still maintaining great line consistency due to the nature of design and combination of synthetic and natural hair.

Size 1 — 20.75 ea.   The size 1 is slightly larger than the 0 and will perform the same as the 0 with a slightly heavier line. As with all the Kafka brushes, they perform with oil-based enamels as well as urethane striping paint.

Size 3 — 20.75 ea.   The size 3 will work in a wide variety of applications from scroll striping to shorter, long-line designs. This brush will give the user greater control in all applications and flatten the learning curve for novice stripers. The size 3 is also the most used favorite of its designer, Steve Kafka.

Size 5 — 21.25 ea.   The size 5, which is slightly larger than the size 3, holds more paint and will accomplish heavier designs with ease. Depending on pressure, the line thickness can reach 1/4" and fine lines to 1/16" in the other direction. This brush is a favorite for outlining larger flame layouts, cars, trucks, and semi trucks.

Size 6 — 21.25 ea.   The size 6 will give you the heavier lines needed in many instances, but still can deliver delicate design work. It's used for initial layouts followed by smaller sizes for more delicate additions in beautiful combinations.

Kafka Signature Series Longliners

This series of longliner brushes was designed to run consistent, long lines with greater line quality and control. The handles were left long so they may be trimmed to fit inside the web of your hand, or to use as they are. The longliner series has received incredible accolades from all of the top long-line pinstripers

Size 5/0 — 23.50 ea.   The 5/0 is the finest longliner brush available. It will lay pin lines for incredible distances with ease and beautiful line quality. It soon will become the standard for the fine line stripers everywhere.

Size 3/0 — 23.50 ea.   The 3/0 will match any brush currently available for fine line work, but surpasses them all for durability, line quality, and control.

Size 00 — 23.50 ea.   The 00 is probably favored for lines on most cars. Other brands of brushes include the size 00, but when you use our other sizes the reason for us making a variety becomes clear.

Size 0 —   24.50 ea.   The size 0 brush performs all longliner functions as the size 1, just not as heavy. Synthetic and natural hairs are used for long life, line consistency, and control.

Size 1 —   24.95 ea.   Size 1, the largest brush of this series, holds lots of paint and will do over a ¼" (6.4 mm) line with ease. It will also do fine lines with less pressure perfectly

Kafka Design Series Short Stroke Brush

we have a shorter version of our number one seller, the #3 signature series scrolling brush. This will help the new pinstriper navigate intricate loops and scroll designs easily and flame outlines will be achieved with greater ease.
It has a gold plated ferrule, a dark stained natural wood handle, and the most successful hair combination. **One size only. - 22.50 ea.**

Signwriters Bulletin Fitches & Cutters

MACK® SINCE 1891

Angular Fitch Liner

SERIES 4090

• **Finest 100% White Hog Bristle** • **Seamless Nickel Ferrules** • **Long Blue Varnished Handle**

This angular fitch is good for awning work. Sign painters also find it easier to use an angular brush when working on a wall or upright surface. It is good for outdoor work (awnings, walls, bulletins and rough surfaces). This brush is not chiseled. There is no advantage to chisel an angular liner, since most sign painters want an even down stroke.

LETTERING BRUSHES – MACK

Mack Wizard Scribe Synthetic Sable Lettering Brush

You will notice that the hair length is longer than a traditional quill which gives the brush a precision snap without losing that coveted feel. This brush carries the paint well and delivers the paint effectively.

Let's see what Steve "Wizard" Chaszeyka has to say about the brush.
"This new synthetic lettering quill is full of surprises. Snappy and controllable, this brush gives me the moves I like to lay out script, casual and more disciplined letter styles as well. Carries a lot of paint, and delivers on point. Tight and efficient, no wasted moves."
With the exorbitant price of pure red sable today the Wizard synthetic brush is an excellent alternative at a fraction of the cost.

Available in sizes 0 – 1 – 2 – 3 – 4 – 5 – 6 – 8 – 10 – 12

MACK FOXY TAILS BRUSH SET OF 6

FOXY TAILS (M/T)
The latest brush set to join the Tidwell family is here!
This set consists of **SIX** new brushes:
Sneaky – Medium, round, pointed brush
Sly Filly – Small, flat, long filbert brush
Crafty – Medium, flat, long filbert brush
Tricky – Large, round, pointed brush
Slick – Extra long, round, pointed brush
Bushy – Large, flat, extra long filbert brush

4 out of the 6 are pretty unique. The shape, hair configuration, hair lengths, and types of hairs were tweaked to create some really cool brushes. We butchered a lot of art and lettering style brushes and tested a variety of synthetic hair combinations in order to get these exactly the way we wanted them.
Two of them are pretty traditional round, pointed brushes… but even those have unique lengths and sizes. Again, just a little Tidwell tweak on the standard round brush.
Tidwell's Foxy Tail brush set with selected synthetic hair and orange lacquered handles.

Comfortable to hold, easy to care for and robust. Suitable for all acrylic paints, enamels and urethane paints.
Set of 6 – 47.95

Mack's new Striping Brushes

Mack's new Black Widow Scroller

The Wizard Black Widow is the latest scrolling brush from Mack Brush and Steve "The Wizard" Chaszeyka. Developed for maximum control and response, to the specs of a veteran scroll striper, it holds the line and delivers beautiful results. If you use scroll striping, you'll love this brush!

Available in 5 sizes

000	00	0	1	2
11.65	12.25	12.85	13.50	14.00

MACK DRAG'N FLY LONG LINER BRUSH

A soft and snappy full synthetic (Teijin) long liner. Primarily intended for a personal style of lettering, pictorials and pinstriping. This brush set flat-out performs superb for small lettering, script, outlining text and images.

Create intricate design work with a brush that can get in the tight spaces and keep your line work as fine as possible. Works perfect with enamels, inks, urethanes, and water based colors. (adjust viscosity accordingly)

Available in 8 sizes: 000, 00, 0, 1, 2, 3, 4 & 5

MACK M/T 3 PIECE BRUSH SET

Tidwell Brushes – M/T 3 Piece Set

The new 3 piece paint brush set Size is - Five Speed:Which is a larger version of the " SLIM" from the original set. The five speed is basically a #5 script / scroll brush as the slim was basically a #3 or so.

Heavy:
Which is a larger version of the "LIL BIT MORE" … it's a little longer and fatter so it has a ton of uses… seriously.

One-Liner:
This is a completely new brush… it is Amazing for outlining, details, med. to long lines within an illustration.

Price – 21.75 per set of 3

MACK M/T 6 PIECE BRUSH SET

Tidwell Brushes – M/T 6 Piece Set

Price per set of 6 – 41.95

These brushes work great with enamels, acrylics, oils, and I'm sure they will work with just about any other medium.

You have the Mini, Lil'Bit, Slim, Skinny, Lil'Bit More, and Flat Top. The handles are a little fatter in the belly (where you grab 'em), so they have a little more room for normal-sized hands (see the picture for a good idea). The bristles vary depending on the brush size and configuration. The smaller brushes are made of a softer, fine quality synthetic. The large flat and the long outliner are made with golden synthetic.

They blend paint really well without the brush strokes of stiffer bristles. They also work for lines, shading, and for sharp detail. The brushes really speak for themselves.
I know there is no perfect brush or brush set for everyone, but I seriously doubt you'll find a more useful brush set at this price.

– Jeral Tidwell

OPEN HOUSE

Inktech INTERNATIONAL CORPORATION

SUBSTRATES : PAPER AND CARD, WOOD, POLYSTYRENE, VINYLS(PVC), ABS, ACRYLICS, TOP COATED POLYESTER, TYVEK ®.

APPLICATION : P.O.P. / DISPLAY , SIGNS , DECALS

Product Information

A long-term multi-purpose outdoor ink designed to print on a wide range of substrates. GP Series ink eliminates the need for carrying a large inventory of different types of ink. Ideal for P.O.P. and general display applications where a semi-gloss finish, scuff resistant surface, is required.

Application Information

Thinning : May be used straight from the can but it is recommended to thin 5 - 15% by weight with GP-1800 Thinner. Substitute GP-1800 Thinner with GP-1820 Slow Thinner to improve screen stability. For maximum lightfastness or outdoor durability, little or no thinning is recommended.

Additives : GP-1700 Clear should only be used to increase transparency of colors. However, this will reduce the durability and lightfastness of the color. To improve scuff resistance add up to 10% GP-1860 Anti-Scuff Agent. Use GP-1350 Overprint Clear to increase scuff resistance or to provide a uniform gloss level to a GP-0000 ink film. Add 5% to 10% of DC-393 Gel Retarder to thinned ink to maintain screen stability. If required, use a small amount of GP-1730 Process Clear to improve print quality.

Wash-Up : GP-1800 Thinner
ITC-1840 Wash-Up

Coverage : Approximately 2100 sq.ft./1 U.S. Gallon using a 280/in. monofilament fabric.

Fabric/Stencil : 200 to 355 monofilament fabric . Direct and indirect photostencil or water soluble hand cut stencils are suitable.

Drying : By solvent evaporation . GP-0000 Series dries in 15 to 30 minutes at normal room temperature or can be jet dried 20 to 45 seconds at 150 °F. to 200 °F. Allow more time between prints for multiple color jobs.

Die Cutting/Creasing/Vacuum Forming : Can be successfully die-cut or creased but should be tested prior to production . GP-0000 series has excellent vacuum form-ing characteristics. Gloss levels may increase during vacuum forming depending on temperature and substrate used.

Packaging : Inks :   1 U.S. Qt / 0.94 Lt.
1 U.S. Gal. / 3.78 Lt.
Solvents :   1 U.S. Gal. / 3.78 Lt.
5 U.S. Gal. / 19.00 Lt.

CAUTION :
1. It is the printer's responsibility to pre-test the ink selected prior to engaging in a
   production run .
2. Refer to Material Safety Data Sheet for heavy metal content.

*   Based on information received from our suppliers, these colors may contain the deliberate addition of heavy metals.

*   Heavy metal free colors are available on request.

GLOSS VINYL INK

GLV - 0000 SERIES

SUBSTRATES : PRESSURE SENSITIVE VINYL FILMS , VINYL COATED PRODUCTS , RIGID AND FLEXIBLE VINYLS , PVC BOTTLES , VINYL TOP-COATED POLYESTER FILMS, ACRYLIC, POLYCARBONATE.

APPLICATION : VINYL BANNERS , DECALS , SUB-SURFACE PRINTING , FLEXIBLE SIGNAGE, PVC CONTAINERS.

Product Information

A multi- purpose, gloss vinyl screen ink designed for printing on vinyl surfaces where a high gloss finish, flexibility and outdoor durability are required. Ideal for fleet markings, vinyl upholstery decoration, PVC and acrylic containers. GLV series ink exhibit excellent screen stability.

Application Information

Thinning : May be used straight from the can but it is recommended to thin 5 - 15% by weight with GLV-1800 Thinner. For maximum lightfastness or outdoor durability, little or no thinning is recommended .

Additives : GLV-1700 Clear should only be used to increase transparency of colors. However, this will reduce the durability and lightfastness of the color. If required, use a small amount of GLV-1730 Process Clear ink to improve print quality.

Wash-Up : GLV-1800 Thinner
       ITC-1840 Wash-Up

Coverage : Approximately 2100 sq.ft./1 U.S. Gallon using a 280/in. monofilament fabric.

Fabric/Stencil : 200 to 355 monofilament fabric . Direct and indirect photostencil or water soluble hand cut stencils are suitable.

Drying : By solvent evaporation. GLV Series air dries in 30 to 60 minutes. Allow more time when overprinting to avoid possible re-wetting of previous colors. For jet-drying applications, test Modified Acrylic AM-0000 Series.

Die Cutting/Creasing : Can be successfully die cut or creased but should be tested prior to production .

Packaging : Inks :   1 U.S. Qt   / 0.94 Lt.
                      1 U.S. Gal. / 3.78 Lt.
      Solvents : 1 U.S. Gal. / 3.78 Lt.
                      5 U.S. Gal. / 19.00 Lt.

CAUTION :
1. It is the printer's responsibility to pre-test the ink selected prior to engaging in a production run .
2. Refer to Material Safety Data Sheet for heavy metal content.

* Based on information received from our suppliers, these colors may contain the deliberate addition of heavy metals.
* Heavy metal free colors are available on request. The following price pages also list these same colors with a lead-free content.

ITC-1840	INKTECH #60 WASH UP (16KG)	N/A	235.20	

inktech INTERNATIONAL CORPORATION

SUBSTRATES : CORRUGATED PLASTICS, FLUTED CO-POLYMER RESIN PLASTICS, POLYPROPYLENE.

APPLICATION : P.0.P./ DISPLAYS, REAL ESTATE SIGNS, BUS SIGNS.

Product Information
A fast drying high gloss ink designed for indoor or outdoor use. Suitable for corrugated plastic sheets manufactured from special co-polymer resins. CRP series inks exhibit excellent scuff, water and outdoor resistance.

Application Information

Thinning : May be used straight from the can but it is recommended to thin 5 - 15% by weight with CRP-1800 Thinner. Substitute CRP-1800 Thinner with CRP-1820 Slow thinner to improve screen stability. For maximum lightfastness or outdoor durability, little or no thinning is recommended.

Additives : CRP-1700 Clear should only be used to increase transparency of colors. However, this will reduce the durability and lightfastness of the color. Add 5% to 10% of DC-393 Gel Retarder to thinned ink to maintain screen stability.

Wash-Up: CRP-1800 Thinner

ITC-1840 Wash-Up

Coverage : Approximately 2100 sq.ft./1 U.S. Gallon using a 280/in. monofilament fabric.

Fabric/Stencil : 200 to 305 monofilament fabric. Direct and indirect photostencil or water soluble hand cut stencils are suitable.

Drying : By solvent evaporation . CRP-0000 Series dries within 30 minutes at normal room temperature or can be jet dried 20 to 45 seconds at 150 °F. to 200 °F. Allow more time between prints for multiple color jobs.

Die Cutting/ Creasing: Can be successfully die-cut or creased but should be tested prior to production.

Packaging : Inks :   1 U.S. Qt / 0.94 Lt.
1 U.S. Gal. / 3.78 Lt.

Solvents :   1 U.S. Gal. / 3.78 Lt.

CAUTION :
1. It is the printer's responsibility to pre-test the ink selected prior to engaging in a production run .
2. Refer to Material Safety Data Sheet for heavy metal content.

*   Based on information received from our suppliers, these colors may contain the deliberate addition of heavy metals.

*   Heavy metal free colors are available on request.

INKTECH INTERNATIONAL CORPORATION

SUBSTRATES : PAPER, METAL, GLASS, WOOD, MASONITE, TREATED POLYPROPYLENE & POLYETHYLENE (P&P), PRESSURE SENSITIVE MATERIALS.

APPLICATION : OUTDOOR METAL SIGNS & DISPLAYS, LICENSE PLATES,
NOVELTIES, PACKAGING CONTAINERS, REFLECTIVE SIGNAGE.

Product Information
A high gloss multi-purpose ink designed for long term outdoor application. Ideal for exterior traffic signs, POP/displays, treated (P&P) containers.

Application Information
Thinning : May be used straight from the can but it is recommended to thin 5% by weight with GLE-1800 Thinner. When more than 5% thinning is required, it is recommended to use GLE-1900 Thinning Varnish to maintain optimum gloss. For maximum lightfastness or outdoor durability, little or no thinning is recommended.

Additives : GLE-1700 Clear should only be used to increase transparency of colors. However, this will reduce the durability and lightfastness of the color. Use a small amount of GLE-1730 Process Clear ink to improve print quality, if required. To prevent ink skinning in can, spray a light mist of GLE-1950 Anti-Skinning Agent on the surface of ink in partially used cans. Repeat whenever ink can is opened for reuse.

Wash-Up : GLE-1800 Thinner
GLE-1840 Wash-Up

Coverage : Approximately 1300 sq.ft./1 U.S. Gallon using a 230/in. monofilament fabric.

Fabric/Stencil : 158 to 280 monofilament fabric. All stencil systems are suitable.

Drying : By oxidation in approximately 1 ½ to 4 hours for over printing or overnight before final stacking. Best rack-drying results are obtained when an ambient temperature is more than 20 °C (68 °F). Prints may be forced dried 15-20 min. in an oven with temperature not exceeding 120 °C (250 °F). Baking at temperatures higher than recommended may cause loss of gloss. To speed drying time under adverse humid or cold weather conditions, add approximately 40-50 grams of GLE-1880 Accelerator to a gallon of ink.

Die Cutting/Creasing : Can be successfully die cut or creased but should be tested prior to production .

Packaging : Inks :   1 U.S. Qt   /   0.94 Lt.
            1 U.S. Gal. / 3.78 Lt.
      Solvents : 1 U.S. Gal. / 3.78 Lt.
            5 U.S. Gal. / 19.00 Lt.

CAUTION :
1. It is the printer's responsibility to pre-test the ink selected prior to engaging in a production run .
2. Refer to Material Safety Data Sheet for heavy metal content.

* Based on information received from our suppliers, these colors may contain the deliberate addition of heavy metals.
* Heavy metal free colors are available on request. The following price pages also list these same colors with a lead-free content

ITC - 1840	INKTECH #60 WASH UP (16KG)	N/A	235.20	

INTERNATIONAL CORPORATION

SUBSTRATES : PRESSURE SENSITIVE VINYL FILMS, VINYL COATED PRODUCTS, VINYL TOP-COATED POLYESTER FILMS, ACRYLIC, REFLECTIVE VINYL, FLEXIBLE VINYL AWNINGS, ABS, POLYCARBONATE.

APPLICATION : VINYL BANNERS, DECALS, SUB-SURFACE PRINTING, FLEXIBLE SIGNAGE, ACRYLIC DISPLAYS, FLEET MARKINGS, MEMBRANE SWITCH.

Product Information

A fast dry long term outdoor vinyl ink designed to print on a wide variety of vinyl and vinyl coated products. Ideal for fleet markings and membrane switches.

Application Information

Thinning : May be used straight from the can but it is recommended to thin 5 - 15% by weight with AM-1800 Thinner. Substitute AM-1800 Thinner with AM-1820 Slow Thinner to improve screen stability when shop conditions are hot. When printing on Polycarbonate, acrylics and PETG thinning with AM-3200 Anti-Crazing Thinner may prevent crazing on substrate. For maximum lightfastness or outdoor durability, little or no thinning is recommended.

Additives : AM-1700 Clear can be used to increase transparency of colors. However, this will reduce the durability and lightfastness of the color. Add 5 - 10% DC-393 Gel Retarder to thinned ink to maintain screen stability. If required, use a small amount of AM-1730 Process Clear ink to improve print quality.

Wash-Up : AM-1800 Thinner

ITC-1840 Wash-Up

Coverage : Approximately 2100 sq.ft./1 U.S. Gallon using a 280/in. monofilament fabric.

Fabric/Stencil : 200 to 355 monofilament fabric. Direct and indirect photostencil or water soluble hand cut stencils are suitable.

Drying : By solvent evaporation . AM-0000 Series air dries in 10 to 20 minutes or can be Jet-Dried to 20-45 seconds at 150°F to 200°F. Allow more time when overprinting to avoid possible re-wetting of previous colors.

Die Cutting/Creasing/Vacuum Forming : Can be successfully die cut or creased but should be tested prior to production. AM-0000 series has excellent vacuum forming characteristics. Gloss levels may increase during vacuum forming, depending on temperature and substrate used.

Packaging : Inks :   1 U.S. Qt   / 0.94 Lt.

1 U.S. Gal. / 3.78 Lt.

Solvents :   1 U.S. Gal. / 3.78 Lt.

CAUTION :
1. It is the printer's responsibility to pre-test the ink selected prior to engaging in a production run .
2. Refer to Material Safety Data Sheet for heavy metal content.

* Based on information received from our suppliers, these colors may contain the deliberate addition of heavy metals.

* Heavy metal free colors are available on request.

inktech INTERNATIONAL CORPORATION

SUBSTRATES: LACQUER AND PYROXILLIN COATED STOCKS, CARD/PAPER, WOOD, TREATED POLYESTER.

APPLICATION: PAPER AND CARD DISPLAYS, GREETING CARDS, FOILS, BOOK COVERS, HOCKEY STICKS**.**

Product Information
A multi- purpose, hard finish nitrocellulose lacquer with excellent adhesion to a wide variety of substrates. GLL series ink has excellent opacity, high gloss with good mar resistance and is designed for indoor and medium term outdoor application.

Application Information

Thinning : May be used straight from the can but it is recommended to thin 5 - 15% by weight with GLL-1800 Thinner. Substitute GLL-1800 Thinner with GLL-1820 Slow Thinner to improve screen stability when shop conditions are hot. For maximum lightfastness or outdoor durability, little or no thinning is recommended.

Additives : GLL-1700 Clear should only be used to increase transparency of colors. However, this will reduce the durability and lightfastness of the color. If required, use a small amount of GLL-1730 Process Clear ink to improve print quality.

Wash-Up : GLL-1800 Thinner

ITC-1840 Wash-Up

Coverage : Approximately 2100 sq.ft./1 U.S. Gallon using a 280/in. monofilament fabric.

Fabric/Stencil : 200 to 300 monofilament fabric . Direct and indirect photostencil or water soluble hand cut stencils are suitable.

Drying : By solvent evaporation . GLL Series air dries in 20 to 40 minutes at normal room temperature or can be Jet-dried 20 to 45 seconds at 150 °F to 200 °F. Allow more time when overprinting to avoid possible re-wetting of previous colors.

Die Cutting/Creasing : Can be successfully die cut or creased but should be tested prior to production.

Packaging : Inks :   1 U.S. Qt   / 0.94 Lt.

INKtech INTERNATIONAL CORPORATION

SUBSTRATES : SOME VINYL COATED PRODUCTS , RIGID AND FLEXIBLE VINYLS.

APPLICATION : NOVELTIES, BOOK COVERS , INFLATABLES

Product Information

A matte -finish multi- purpose vinyl ink formulated for printing on rigid and flexible vinyls and vinyl coated fabrics. Designed for indoor and medium -term outdoor exposure; e.g. bumper stickers, beach balls etc.

Application Information

Thinning : May be used straight from the can but it is recommended to thin 5 - 15% by weight with MAV-1800 Thinner. For maximum lightfastness or outdoor durability, little or no thinning is recommended.

Additives : MAV-1700 Clear should only be used to increase transparency of colors. However, this will reduce the durability and lightfastness of the color.

Wash-Up : MAV-1800 Thinner
           ITC-1840 Wash-Up

Coverage : Approximately 2100 sq.ft./1 U.S. Gallon using a 280/in. monofilament fabric.

Fabric/Stencil : 150 to 280 monofilament fabric. Direct and indirect photostencil or water soluble hand cut stencils are suitable.

Drying : By solvent evaporation . MAV Series air dries in 30 to 60 minutes. Allow more time when overprinting to avoid possible re-wetting of previous colors.

Die Cutting/Creasing : Can be successfully die cut or creased but should be tested prior to production .

Packaging : Inks : 1 U.S. Qt   / 0.94 Lt.
                       1 U.S. Gal. / 3.78 Lt.
            Solvents : 1 U.S. Gal. / 3.78 Lt.
                       5 U.S. Gal. / 19.00 Lt.

CAUTION :
1. It is the printer's responsibility to pre-test the ink selected prior to engaging in a production run .
2. Refer to Material Safety Data Sheet for heavy metal content.

*   Based on information received from our suppliers, these colors may contain the deliberate addition of heavy metals.

*   Heavy metal free colors are available on request.

Bronze Powders

The addition of a small amount of solvent (correct for the vehicle being used) to the bronze powder will aid in making a smooth mixture and increase the brilliance of the finished job.

Many printers add the bronze powder to the desired vehicle until a heavy paste results. The paste is then thinned to screening consistency with the correct solvent.

Use the proper clear base (bronzing vehicle) and thinner, depending on the substrate to be printed. Use approximately 2-3 lbs of gold powder to 1 gallon of clear base and 1-1 1/3 lbs. of Aluminum powder to 1 gallon of clear base. For best results use a monofilament screen fabric of 180 mesh to 230 mesh.

INTERNATIONAL CORPORATION

160 Fenmar Drive Toronto, Ontario, M9L-1M6   Tel (416)743-4111   (877)465-6362   Fax :(416)743-1511

SUBSTRATES : CARD, PAPER

APPLICATION : LOTTERY TICKETS, GAMES

Product Information

An opaque scratch-off ink designed for overprinting on printing images. Suitable for lottery tickets, sweepstakes, games, direct mail coupons etc. Prints can be removed easily with fingernail or coin and does not powder.

Application Information

Thinning : May be used straight from the can or thin to required viscosity with SCO-1800 Thinner. Over thinning will reduce opacity.

Additives : SCO-0030, Release Varnish may be used to coat certain stocks prior to printing if Scratch-off ink does not release properly. If ink releases too easily, add 1 - 5 % of SCO-0070, hardener to ink and retest.

Wash-Up : SCO-1800 Thinner
 ITC-1840 Wash-Up

Coverage : Approximately 1200 sq.ft./1 U.S. Gallon using a 150/in. monofilament fabric.

Fabric/Stencil : 110 to 196 monofilament fabric. It is recommended to use as coarse of a mesh as the detail will allow. Direct and indirect photostencil or water soluble hand cut stencils are suitable.

Drying : By solvent evaporation . SCO Series air dries in 15 to 40 minutes or can be force-dried in seconds at temperatures of 90 deg. F. to 170 deg. F. Use of excessive heat may cause ink not to scratch off.

Die Cutting/Creasing : N/A

Packaging : Inks :   1 U.S. Qt   /   0.94 Lt.
                                 1 U.S. Gal. /   3.78 Lt.

NAZDAR®

screentec CORPORATION

ADE Series
Epoxy Screen Ink (2 Part)

Nazdar ADE Series Epoxy Screen Ink

ADE inks are formulated with high-quality epoxy resins for excellent adhesion to a wide range of hard-to-print substrates. ADE provides outstanding solvent, chemical and abrasion resistance. ADE is a two-part ink system and must be initiated with ADE677 catalyst prior to use.

SUBSTRATES: Epoxy, melamine, treated polyethylene, polypropylene, metals, glass, PC boards.

END USES: Ideal for electronic and industrial applications.

MESH: 200-305 monofilament polyester or stainless steel mesh.

STENCIL: Direct method photo emulsion or equivalent. Also, any solvent resistant film or photo emulsion.

INK PREPARATION: Before using ADE ink, add 1 part ADE677 Catalyst to 5 parts ink. Pot life of catalysed ADE ink is approximately 6-8 hours. ADE678 High Performance Catalyst and ADE679 Snowboard Catalyst - Contact Technical Service for special data sheet.

AIR DRY: 30-60 minutes at room temperature.

FORCE-DRY: 3-5 minutes at 150°-180°F. Baking ADE prints for 10 minutes at 300°-325°F will produce the hardest, most durable prints.

EXTENDERS / ADDITIVES: To extend colour and / or reduce pigmentation, add ADE26 Mixing/Metallic Clear. For printing halftones and fine details, add ADE90 Heavy Body Base. For best printing results, reduce ink with 5-15% (by weight) RE190 Thinner. To prevent drying in screen under hot, humid conditions, add RE182 sparingly.

CLEAN UP: SW37 Wash Up.

DA Series Nylon and Flock Screen Ink & DA Accelerator (2 Part)

Highly opaque and extremely flexible and elastic inks for printing and flocking most synthetic and natural textiles, includes waterproof nylon and other synthetics having a finish. (Pre-testing of waterproof nylon is recommended.) DA Series have virtually unlimited resistance to laundering and dry cleaning as well as ironing.

The DA Accelerator has been formulated to accelerate drying times of DA Series Nylon Inks.

SUBSTRATES: Cotton, cotton blends, synthetics, waterproof nylon, and finished synthetics.

END USES: Nylon jackets.

MIXING INSTRUCTIONS: DA Series is a two-part polymerizing system. All colours must be mixed with DA176 Catalyst in a proportion of 3.5 parts of colour to AT LEAST one part of catalyst BY WEIGHT. Catalyst DA176 is sensitive to moisture changes and should be stored in a cool, dry place. Catalyst should be kept tightly closed at all times. Use one quart of DA ink with a half pint of DA176 Catalyst and add up to 75 drops (1 gram) of DA Accelerator. Stir well.

FINISH: Gloss.

DRYING: DA Series will in most cases air-dry overnight for subsequent handling depending on ink/catalyst ratio. The ink will continue to cure for three to four days. Full resistance to washing and dry cleaning is effected approximately seven days after printing. Heat-curing at 300-325°F (148-160°C) is required for periods ranging from seven to 10 minutes. Correct use of DA Accelerator will reduce the drying time of DA Series Inks to four minutes at 300°F (149°C).

click here for color card

STENCILS: Direct emulsions, photographic stencils or water soluble knife cut film.

SQUEEGEE: 60-80 durometer, square-edged blade.

CLEAN UP: VF184 Screen Wash.

OPACITY: All colours have excellent opacity and may be printed onto black or other dark grounds.

COVERAGE: Approximately 500-600 sq. ft/gal., depending upon screen fabric mesh.

**MESH:** 110-200 monofiliment mesh is recommended.

PX Series Perma-Flex Flock Adhesive Ink
DISCONTINUED

GC PLASTISOL INKS

Click here for color chart

PRODUCT FEATURES
- Multi-purpose Plastisol Inks for Direct and Indirect printing.
- Excellent elasticity
- Super Opaque colours
- Low residual odour
- Non-bleeding colours

PRODUCT DESCRIPTION
GC Plastisol is a soft, creamy ink designed for both direct and transfer printing applications either hot or cold peel. Plastisol has excellent coverage on dark fabrics, yet easily adjusts to a "softhand" finish on light or white fabrics. With the addition of one or two products Plastisol becomes a true Multi-purpose Plastisol. Excellent results can be obtained in direct printing Wet-on-Wet without any build-up colours.

DRYING
Direct printing on garments 325° F for 1-1/2 minutes transfer printing (cold and hot peel) 220-240°F for 20-60 seconds. (Note: the heat-transfer press provides the full curing). The cure on direct printed garments may be affected by the thickness of the ink deposit, heat fluctuations and the type of dryer. Too much heat may cause the dyes in the garment to migrate (colour bleeding), fabric scorching and shrinkage. A good test to see if the ink is cured is to stretch the cured print; if it stretches like a rubber band, then it has formed a continuous film and is fully cured. If it starts to break apart, then it is under cured. Additional passes through the dryer at the same temperature setting does not work. It is necessary to increase the temperature if the garment reaches 325°F, the Plastisol ink will be well cured.

TRANSFER APPLICATION
For regular transfers the recommended temperature is 360-375°F for 6 seconds applied under pressure. Let cool for a few seconds and peel. For Hot Split transfers the recommended temperature is 360°F for 6 seconds, applied under pressure. Peel paper immediately.

SUBSTRATES
Cotton and Poly/cotton blends, most open mesh knits but not materials that have been waterproofed.

FABRIC/STENCIL
For heavy deposit printing on dark garments use 86-139 Monofilament. For light deposit printing on white orlight coloured garments use 157-245 Monofilament. For Hot-split transfer paper use 86-157 Monofilament. The recommended fabrics are to be used as a guideline only and to achieve the best results testing should be done. All stencil systems can be used, but direct photographic emulsions will provide the most durable stencil. Indirect stencils can be used.

THINNERS
1180-50 Thinner. Plastisol inks may be used straight from the can, but maximum 20% of thinner is recommended. For reducing viscosity when required .

CAUTION Too much thinner may increase the curing requirements of ink resulting in fabric scorching, shrinkage, especially on 50-50 Poly/cotton fabric blends.

HEAT TRANSFER PAPER
TRANSFERT-75 COLD PEEL HEAT TRANSFER PAPER.

TECHNIPLAST®

ADDITIVES
The 1100 series Plastisol ink may be used straight from the container but a maximum 2% of 1180-50 wetting agent thinner is recommended for reducing viscosity when required. Too much thinner may increase the curing requirement resulting in fabric scorching and shrinkage, especially on 50/50 polyester cotton. Using Mineral Spirits for thinning purposes will cause resin particles to swell, creating changes in viscosity which may cause poor opacity or blurred images. Plastobond - add 10-15% to Plastisol Ink for nylon printing. Powder Transfer adhesive - a bonding agent that promotes adhesion to the garment.

1. Allow 24-96 hours after test printing to evaluate ink for intended application.
2. If product requires overlapping coats, (multi-colors) test ink on substrate with over lapping colors.
3. Refer to MSDS sheet for heavy metal content.

WIPING AND CLEAN-UP RAGS

White Flannel Wipers

Soft and strong, White flannel cleaning cloths are produced from flannel bed sheets and pyjamas.Flannel rags are excellent polishing cloths for furniture manufacturers, polishing metals and printing presses or for buffing cars after waxing.

25 Lb. package -White Flannel Wipers - 53.35 pkg.

White Polo Wipers (T-Shirt)

Soft, low in lint, high in cotton content for excellent absorbency. Made from pure white t-shirts, these efficient multipurpose painters' and staining wiper has numerous other high end applications. Excellent for use with solvents or chemicals which may cause colours to run.

25 Lb. package -White Polo Wipers   61.50 pkg.

FLATTENING POWDERS

An excellent extra-fine powder used to flatten gloss finishes. Specially formulated to avoid hazing in clear vehicles and over-print vehicles.

FL005 - 1lb. - 57.75

MacDermid ⊕Alkemi
Chemicals & Solvents

AKEMI HAZE REMOVER is an extremely efficient, low caustic stain remover. It will effectively remove most types of ink and stencil stains with a minimum amount of effort.

5 Litre - 55.75   25 Litre - 229.00

Alkemi haze remover

Alkemi Degreaser Concentrate: is a water-based mesh preparation that removes grease and contaminants from the screen prior to stencil application. It is offered in a standard concentration of 1:10/15 formula which is diluted with 10-15 parts of water for a ready to use product.   **1 Litre - 38.00**

degreaser

Alkemi A-7 SCREEN WASH is a high flash point, low odour, lowest evaporating and low VOC screen wash. Highly effective screen wash for manual printing and automatic machine (EN12921-3:2005 compliant),
For cleaning of textile, graphics, and industrial inks.   **for full specs and data sheet - click here**
5 Litre - 115.00   20 Litre - 360.00

CPS A-7 wash

Alkemi A-6 SCREEN WASH is a slow evaporating cleaner for most types of screen printable graphics inks. Also when used during reclaiming as a haze remover for light stains.   **5 Litre - 76.00**

TEK-401C 1L Emulsion Remover   A biodegradable, 100% water-soluble concentrate to be diluted 1:20 with water for fast removal of emulsions and capillary films   **1 Litre - 61.35**

MONOFILAMENT POLYESTER MESH

MONOFILAMENT POLYESTER fabrics are considered the best all-round material for screen printing. Next to stainless steel, it is the most dimensionally stable fabric. The inherent stability and strength of Monofilament Polyester make it ideal for both fine detail, close registration printing as well as general printing.

For adherence of indirect stencils the fabric surface should be treated with an abrasive grit such as ULANO #2 MICROGRIT or ULANO GEL 23.

SEFAR E-MESH

Monofilament Polyester Screen Fabric for general screen printing and textile screen printing.

SCREEN AND FRAME MAKING AIDS

KIWOBOND Frame Adhesives

KIWOBOND 1000 HMT

A fast drying two-component adhesive for adhering mesh to wood, aluminum, and metal frames. 1000 HMT is the choice for high mesh tension and fast drying requirements. The low viscosity aids the application on very fine mesh counts, ideally above 305 tpi (120 tpcm). Not recommended for mesh counts below 156 tpi (60 tpcm). Technical sheet available.

KIWOBOND 930 SET

1000HMT-750 Gram Set (adhesive & hardener)	54.85
1000HMT-4.25 Kilo Set (adhesive & hardener)	249.00
1000HMT-4.25 Kilo Frame Adhesive only	165.00
1000HMT-1 Kilo Hardener only	89.00

KIWOBOND 930

A fast drying two-component adhesive for adhering mesh to wood, aluminum, and metal frames. Its medium viscosity enables easy application even on the coarsest mesh counts. Recommended for mesh counts below 260 tpi (100 tpcm) Technical Sheet available.

KIWOBOND 930 Set - 52.15

AUTOTYPE EXPOSURE CALCULATOR

An all-in-one test positive that helps you determine the best exposure time. The calculator's series of incremental gray neutral filters provides 5 exposure values with just one test exposure. Select one of them for the best stencil thickness, colour/hardness and definition. Features include a 65 line screen ruling and halftone dots in 10, 50 and 90% areas. Also the edge definition/resolution targets have a break in them and very fine type to assist your interpretation. A complete instruction guide is provided with each calculator.
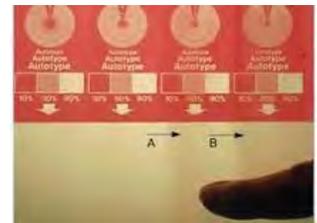

92.00 ea.

SOLVENT RESISTANT Plastic Tape

Durable, white polyethylene reinforced cloth tape is pressure sensitive...has tremendous tack. Perfect for sealing off inside of frames, protecting edges and guides, etc. Molds into all crevices and corners and is simply removed. Tape is 2" wide and comes in 60 yard rolls.

2" x 60 yd. - 36.65

FABRIC PREP

ULANO GEL 23

An abrasive degreaser gel that combines the actions of Microgrit No. 2 and Screen Degreaser Liquid No. 3

The abrading action of Ulanogel 23 promotes better wetting of the fabric and adhesion of the stencil, and thus, longer press life. Its degreasing action removes dirt, dust, and oils from the fabric, reducing the risk of stencil failure and pinholing. Ulanogel 23 is ready-to-use and rinses off in hot or cold water. Its thixotropic character permits easy and effective preparation of larger screens held in a vertical position. Non-caustic - will not harm frames, fabric, or adhesives on stretch and glue frames. Recommended for use with all stencil systems on synthetic fabric only.

Gallon - 62.00

UNIVERSAL MESH-PREP

A non toxic fluid for degreasing and dramatically improving the wetting characteristics of all mesh types. Universal Mesh Prep is fast and easy to apply and harmless to the mesh.
Developed for capillary films but suitable for all stencil systems.

MacDermid Autotype

5 Litre (1.32 gal.) Containers 68.00

ULANO #3 SCREEN DEGREASER LIQUID

A degreaser solution for all fabrics new or used, before stencil making - and as a degreaser after ink removal to speed the action of the stencil removal. Ready to use. No mixing. Foam action cleaning. Degreases effectively in hard water. Rinses clean with hot or cold water. Non caustic.

Quart - 16.25
Gallon - 56.00

SCREEN MAKING AIDS

SCREEN BLOCKOUT

MacDermid Autotype RUBY BLOCK OUT

Outstanding coatability and a high contrast red color are the key features of this premium solvent resistant blockout.
Autotype Ruby Block is a medium viscosity blockout for use on fine and medium mesh. It even coats and fills mesh openings without the drip-through that can lead to pinholes.

5 Litre - 48.00

ULANO 65 SCREEN FILLER

A water-soluble blockout with drying characteristics similar to indirect films to prevent loss of register. Same ink suitability as ULANO Presensitized Fotofilms.

Can be used for touch-ups when thinned with cold water. Can be used in unventilated rooms. Suitable for all ULANO Stencil Systems used with non-aqueous inks.

1 Gallon - 59.00

Kiwo Red Blockout

RED BLOCKOUT is our most economical, water soluble, and solvent resistant screen filler used for blocking out screens before printing. RED BLOCK-OUT can be used to cover large areas of the screen and to touch up pinholes. It is VOC free and contains no alcohol nor solvent. **1 Litre - 20.50**
4 Litre - 43.00

SCREEN RECLAIMING

KIWO Mega-Clean Active Paste - 1 US Gal

KIWO Mega Clean Active : combination solvent and haze remover paste for the removal of most ink stains and emulsion residue in the screen. It has been formulated to be brushed onto the screen and rinsed off with water within a few minutes of application.

U.S. GAL. 107.00

ULANO #78 HAZE REMOVER PASTE

A ink haze and stencil residue remover that is effective on most inks and emulsions. Will also etch most mesh surfaces for film adhesion Follow directions supplied with product to avoid damaging fabric. **1 kilo - 19.95**

ULANO NO 4 STENCIL REMOVER LIQUID

Ready-to-use stencil remover liquid for fast action on all types of fabric, including metalized polyester.

Will not etch fabric. Contains no strong alkalis or hypochlorites. Ideal for use in tanks; will not attack fabric adhesives on rigid frames.

4 litre - 48.00   **1 litre - 15.00**

inktech PRE-MIXED SUPER PASTE

PRE-MIXED SUPER PASTE (Scented) - 4 Litre - 145.00

For cleaning/degreasing all types of meshes.
Super Paste paste will:
- Remove ink and stencil residues thus preventing ghost images, provided these are not due to thread damage by abrasion.
- Degrease and chemically roughen aluminum frames prior to screen stretching.

CPS Degreaser Concentrate:

1 Litre - 38.00

CPS Degreaser Concentrate: is a water-based mesh preparation that removes grease and contaminants from the screen prior to stencil application. It is offered in a standard concentration of 1:10/15 formula which is diluted with 10-15 parts of water for a ready to use product.

EMULSION COATERS

For Direct Emulsions. Exclusive design acts both as a scoop (to carry emulsion) and a coater.

Ideal for precise coating and for large volume users. Made of hard anodized aluminum.
All sizes available from 2" to 84".

Check for prices on sizes not listed.

Heavy Duty Models

A.W.T.'s Rack-It™ heavy-duty drying racks are the perfect choice for industrial drying applications. Built on a welded steel frame, these racks provide a safe and sturdy resting place for your substrates as they dry. Longer lasting than rubber, steel bumpers come standard on all of our heavy-duty racks and are welded to the outside of the shelf for maximum drying room. For smooth up/down operation, the individually adjustable shelf springs give you tension control over each shelf and all shelves feature a rust- and solvent-resistant, powder-coated finish to extend the life of the rack. Also available in heat resistant models for baking applications.

HOT-FLASH™

Textile Flash Cure Unit

Moving Ahead With Technology

Prices shown are in U.S. $
F.OB. Chicago
Ask for landed price in Cdn$

ADVANTAGES
- Solid-state or standard controls
- Protective safety screen
- High-density radiant heat panels
- Heavy-duty height adjustment
- Casters and levelers on base
- Easy pivot head

NEW OPTION
Hot-Flash AUTOTURN™ Head-turning Kit
This optional feature will allow for automatic curing and free up your time to print approximately 20% more garments per hour.

Hot-Flash AUTOTURN™
(Optional, Automatic head turning kit)

The A.W.T. Hot Flash™ is unmatched in value and performance. Solid-state or standard temperature controls provide the consistent heat settings required by today's wide variety of plastisol formulas. High density radiant heat panels assure even heat distribution for fast cure rates.

A protective safety screen prevents accidental contact with the heat panels. Other quality features include a heavy duty height adjustment, an easy pivot head and a solid base designed for extra stability.

Product No.	Roll Size	Roll Price-25yds.
290-4875	**48"x75 ft.**	**449.00 (17.96 yd)**

Summary: GF 290 ChalkMark™ vinyl is a 5.0 mil matte black embossed chalkboard vinyl with a clear high-tack removable adhesive on a 90# liner. The 5.0 mil ChalkMark vinyl is designed for use with soft chalks and liquid chalk markers, and has a washable surface. The HTR adhesive works great on smooth painted drywall, plastic a-frame signs, metals and glass. ChalkMark™ is commonly used to produce decorative wall graphics covering large areas for menu boards or murals. GF 290 ChalkMark can also be used to create promotion graphics, plasticade signs, point-of-purchase graphics and craft cut shapes and decals.
